

# Group Report

The Group Report provides information about each nominated group and a snapshot of results for the scales measured by the Learner Questionnaire (LQ) and Employer Questionnaire (EQ).

For each scale, the Group Report presents information about the:

- count of responses used to calculate the scale score;
- average scale score; and
- variation in scale scores.

Scores are reported on the response scale of 0 to 100, where 0 means 'strongly disagree' and 100 means 'strongly agree'.

Results are provided for learners and/or employers depending on the data entered into SMART.

This Group Report can be used to analyse the number, average and variation of the survey responses. Comparisons can be made across scales, to previous reports, or between learners and employers.
